

National Severe Weather Warning Service

Chief Forecasters Assessment

Snow showers will bring variable snow cover, with the potential for a further 5-10 cm and possibly 15 cm of snow in places where showers are most frequent, whereas some places nearby will receive only small amounts. Strong winds will likely lead to drifting of lying snow, as well as a severe wind chill.

This warning has been updated again, to allow for 1 to 4 cm during the early hours of Thursday in areas northwest of London, and also further west across the north Midlands, just touching Wales near Wreccsam.

The warning should be viewed alongside the embedded Red Warning for central Scotland and the Amber Warning over parts of northern England and Scotland.

The Met Office have issued a **Yellow Warning of Snow**

Valid from **00:05 on Thu, 01st Mar 2018** until **23:55 on Thu, 01st Mar 2018**

Further snow showers are expected on Thursday, accompanied by very low temperatures.

There is the possibility of travel delays on roads, stranding some vehicles and passengers, and delays or cancellations to rail and air travel. Some rural communities could become or remain cut off. Power cuts may occur and other services, such as mobile phones, may be affected.
